

# 1 Rezolvarea erorilor

## 1.1 Profiler + VS Code error

În fișierul `Profiler.h` ai următoarele linii începând cu linia 11:

```
1 // OS detection
2 #if defined(WIN32) || defined(_WIN32) || defined(__WIN32__)
3     || defined(__NT__)
4     #define PROFILER_WINDOWS
5 #elif __APPLE__
6     #define PROFILER_OSX
7 #elif __linux__
8     #define PROFILER_LINUX
9 #endif
10 #ifdef PROFILER_WINDOWS
11     #include <Windows.h>
12     #include <Shellapi.h>
13 #else
14     #include <unistd.h>
15 #endif
```

Trebuie să le modifichi în felul următor:

```
1 // OS detection
2 #if defined(__MINGW32__) || defined(__CYGWIN__)
3     #define PROFILER_VSCODE
4 #elif defined(WIN32) || defined(_WIN32) ||
5     defined(__WIN32__) || defined(__NT__)
6     #define PROFILER_WINDOWS
7 #elif defined(__APPLE__)
8     #define PROFILER_OSX
9 #elif defined(__linux__)
10     #define PROFILER_LINUX
11 #endif
12 #if defined(PROFILER_WINDOWS) || defined(PROFILER_VSCODE)
13     #include <Windows.h>
14     #include <Shellapi.h>
15 #else
16     #include <unistd.h>
17 #endif
```

Mai jos sunt capturile de ecran (în jur de 80% din lățimea textului), încadrate ca figure:

```

(DWORD, PCVOID, DWORD, DWORD, LPWSTR, DWORD, va_list *);
